

Magnattach® Premier

Portable Dance Floor

The most advanced portable floor in the world

World's Fastest Setup

A 20' x 20' Magnattach® Premier portable dance floor can be set up or disassembled by two handlers in just 8 minutes! To achieve this time and labor savings, Magnattach panels literally self lock—so you will never have to deal with time consuming screws, cams or tabs again! Conventional floors require well over an hour and involve tedious & problematic attachment devices.

Triple Lock Security

Magnattach's patented 3-way locking system provides unprecedented safety and security. Each dance floor panel features ultra high strength magnets, interlocking steel wedge bars and aluminum edge ramps that all work together to lock panels like a vise. No other floor has these features!

Exceptional Beauty, flawless Dancing

Magnattach® Premier features the rich color, durability and easy maintenance of Wilsonart® brand laminate finishes. The result is a beautiful expanse of laminate flooring that is free of 'show catching' screw holes or gapping seams. Bottom line? Dancers prefer Magnattach.

Superior Materials, Design, and Manufacturing

To set a new benchmark for ease of use, precision fit, and beauty—only the finest materials are used. Permanent magnets are ultra-high strength nickel plated Neodymium, mounted to an aircraft grade aluminum frame. Additionally, the specialized honeycomb core reduces weight and provides a resilient feel dancers prefer. Together, these high quality materials ensure perfect fit & finish and are manufactured to tolerances of less than seven 1000ths of an inch.

No Moving Parts

The locking system has ZERO moving parts—so there's nothing to break, wear, or repair. No screws, no cam locks, no tabs. The design provides a superior locking system that is incredibly simple to use.

Self Locking, No Separation Design

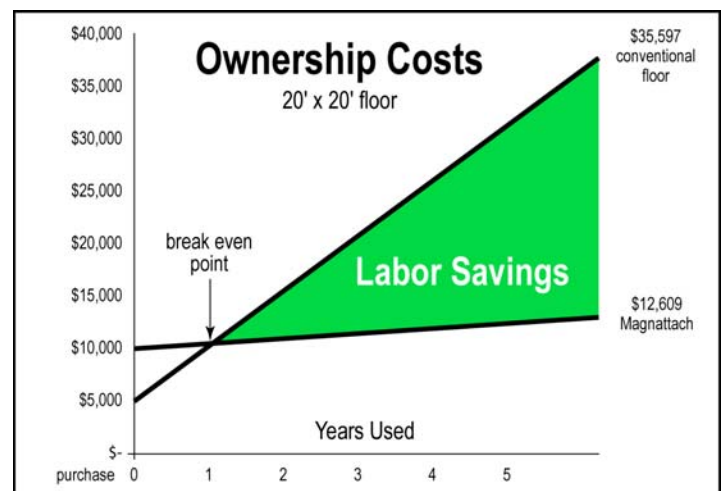

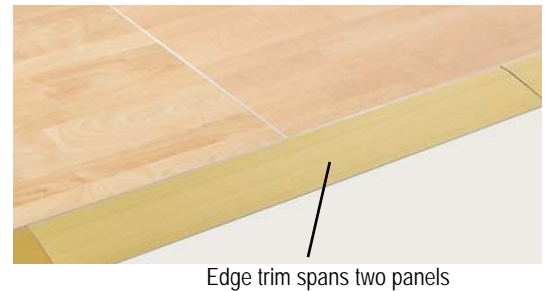

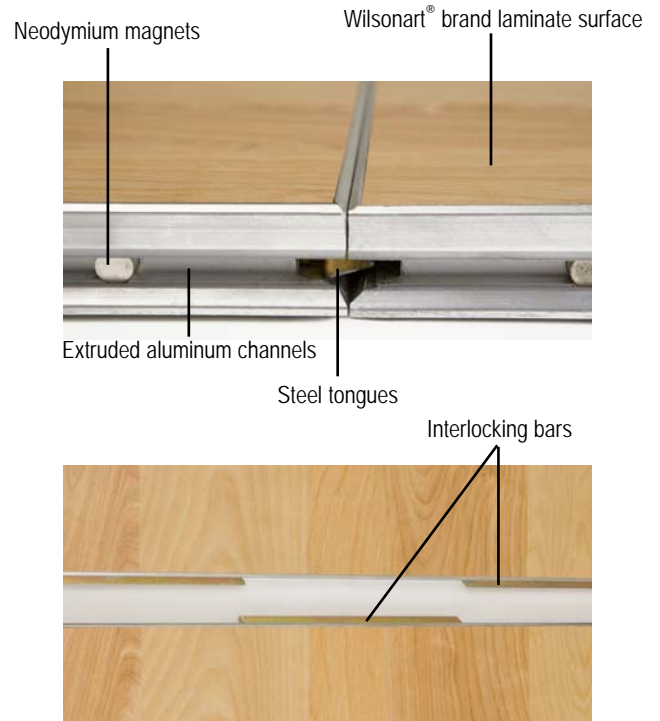

High power magnets self-lock, align, and hold the floor during use employing over 400 pounds of force per panel. Interlocking steel wedge bars prevent both lateral slide and separation as no portable floor has ever done before.

Patented Edge Trim

In addition to providing a smooth transition to the dance floor, Magnattach edge trim uses both magnets and tangent steel bars to tightly lock and hold all perimeter panels. The result is a virtual 'vice lock' around the entire dance floor.

Lowest Cost to Own

An important consideration when purchasing equipment is total cost of ownership over time. Initial price is a factor, but with 'old tech' portable flooring, slow setups & breakdowns impose huge ongoing costs. In contrast, Magnattach reduces operating costs so drastically, that the initial premium is recouped in less than one year. Additionally, extremely fast setup and breakdown allows you to 'turn' rooms that could never have been sold using 'old tech' floors. In other words, Magnattach provides a new source of revenue as well.

The Magnattach Advantage

Magnattach® Premier portable dance floors outperform other portable floors in terms of speed, simplicity, quality, and cost of ownership. For additional Magnattach benefits, call Mity-Lite at 1-800-327-1692.

Northern Birch

Black Cherry

Cherry Rose

4' X 4' format means fewer panels are handled and stored.
